

# SUSTAINABLE EVENT MANAGEMENT POLICY

Our goal is that all our events projects are ecologically, socially and economically sustainable.

An event is a recipient of emotions that must be perceived by the participants with activities limited in time and carefully designed to avoid generating unnecessary waste, squandering valuable resources and to leave a positive legacy in terms of awareness and diffusion of the principles and values of sustainability.

Digital events are more and more often a complementary component of physical events, sometimes even a valid substitute. Applying our Management System to digital events means focusing on those topics that are involved in the organization of the digital event and that are its main component, such as the choice of accessible hardware, the use of green energy resources or the search for innovative and high-performance software in terms of cost and efficiency.

Our design process runs through all aspects of the event and is an opportunity to take concrete action on the sustainability features.

In particular, we are committed to promoting and disseminating our policy to all stakeholders involved and to working to convey this sensitivity to the client who owns the event.

The result, in addition to the sustainability side, will be an increase in the appealing of the event and an enhanced brand reputation.

For this reason, we adopt appropriate strategies in the planning phase and aim to strive for an ever higher degree of sustainability through continuous improvement.

Our values of accessibility, inclusiveness, transparency, integrity and responsible management are binding for all members and employees of our company who, together with the management, are committed to promoting a sustainability culture.

Our Management System is certified ISO 20121:2012 as a Sustainable Management System for digital, hybrid or physical events.

# OUR COMMITMENT TO SUSTAINABILITY

- Consciously manage resources while respecting the environment
- Contain and prevent waste
- Promote eco-sustainable mobility
- Comply with health and safety laws in the workplace
- Ensure that equal opportunities are respected
- Protect worker's human right
- Promote initiative and network with the local community, institutions, schools, associations, sports
- Spreading the culture of ethics and legality
- Promote principles of transparency, fairness and free competition
- Foster ongoing dialogue with suppliers and customers
- Promote research and innovation
- Manage data responsibly in accordance with applicable laws
- Ensure cyber security

# CUSTOMERS AND SUPPLIERS

To ensure quality services to our customers we are committed to research and creativity, the driving force behind our work, with particular attention to economic, environmental and social sustainability.

For this reason we have certified our management system according to ISO 20121:2012 as a Sustainable Event Management System.

Our relationships with suppliers are oriented towards collaboration and sharing, inspired by principles of transparency and ethics and open to dialogue aimed at innovating our services.

Fundamental is the exchange of ideas and objectives that create synergy for the growth of our Management System, but also an indispensable opportunity to spread the culture of sustainability.

Our suppliers and collaborators are partners in our process and are with us to ensure that the end client is able to realize their sustainable event.
